ESF 15 Information Update – H1N1 Flu**

*All times listed in this update are Eastern  
Unknown release times are listed as noon  
Wednesday, April 29, 2009*

104	<p><b>(Sent ) 4/29 ESF 15--SICCL</b> State communicators, Please find the attached ESF 15 Communications Summary and Information Update for the H1N1 flu outbreak.</p>
103	<p><b>(Sent ) 4/29 ESF 15--NICCL</b> Federal communicators, Please find the attached ESF 15 Communications Summary and Information Update for the H1N1 flu outbreak.</p>
102	<p><b>(Sent 6:00 p.m.) SICCL--TESTIMONY BY SECRETARY NAPOLITANO TO THE SENATE COMMITTEE ON HOMELAND SECURITY AND GOVERNMENTAL AFFAIRS ON FEDERAL COORDINATION IN RESPONSE TO THE H1N1 FLU OUTBREAK</b></p> <p>SECRETARY NAPOLITANO: Thank you, Mr. Chairman [Senator Joe Lieberman], Senator [Susan] Collins, members of the committee. Thank you for the opportunity to testify on the national response to the H1N1 flu outbreak. This is, as you have noted, a serious situation that we are treating aggressively.</p> <p>As President Obama said yesterday it is a cause for concern but not for alarm. There is a lot we don't yet know about this outbreak, but we have been preparing, as if we are facing a true pandemic, even though we don't know the ultimate scope of what will occur. We also have been preparing with the understanding that this will be a marathon and not a sprint. We are going to be at this for a while.</p> <p><a href="http://www.dhs.gov">www.dhs.gov</a></p>

100	<p><b>(Sent 4:07) Kentucky Department for Public Health Continues to Be on Alert for Cases of Swine Flu Currently Testing Specimens Submitted by Health Care Providers</b></p> <p>FRANKFORT, Ky. (April 29, 2009) The Kentucky Department for Public Health (DPH) continues to be alert for the presence of swine flu in Kentucky, but has not detected any probable or confirmed cases. If such a case is identified, samples from the patient will be sent to the Centers for Disease Control (CDC) for further testing.</p>

	<p>“While we do not yet have confirmed cases of swine flu in Kentucky, we are continuing to carefully evaluate all potential cases that are being reported by our health care community,” said Public Health Commissioner William Hacker, M.D. “We also join the CDC in cautioning Kentuckians against nonessential travel to Mexico.”</p> <p>DPH also reminds Kentuckians who have traveled recently to Mexico, or other countries or communities within the U.S. where swine flu infection has been reported, or who are planning such travel, to be alert for the symptoms of swine flu in the following ways:</p>
99	<p><b>(Sent 4:40 p.m.) Indiana Press Release - U.S. Pork Supply Remains Safe</b></p> <p>INDIANAPOLIS -- Consumers can take confidence in the safety of the U.S. pork supply and the products they eat, even in light of the recent influenza health concerns.</p> <p>“Influenza is not spread via meat or meat products; therefore, pork is safe to eat,” says Indiana State Veterinarian Bret D. Marsh. “As always, we remind consumers of normal food safety precautions, including handling meat products to avoid cross contamination and to cook them to an internal temperature of 160 degrees Fahrenheit. People just need to know that influenza is not a food safety threat.”</p> <p>Dr. Marsh explains that sick animals are rejected from the human food supply when they are presented for inspection at a processing facility. Inspectors from the Indiana State Board of Animal Health (BOAH) and the U.S. Department of Agriculture are trained to spot any signs of illness or abnormality that would require an animal to be rejected.</p>
98	<p><b>(Sent 4:34 p.m.) Granholm Administration Outlines Steps Michigan is Taking to Protect Citizens Against Influenza A (H1N1) Virus</b></p> <p>Statewide coordinated response to virus outbreak under way</p> <p>Governor Jennifer M. Granholm's administration today outlined the rigorous and comprehensive response under way in Michigan, in coordination with the federal government and health industry experts, as a result of a confirmed case of Influenza A (H1N1) in Michigan.</p>

96	<p><b>(Sent 3:49 pm) NICCL Advisory# 92- 2009 H1N1 FLU UPDATE</b></p>
95	<p><b>(Sent 3:26 pm) Texas Department of State Health Services</b></p> <p><b>News Release</b> <b>April 29, 2009</b></p> <p>Texas Reports Swine Flu in Child from Mexico City</p> <p>Swine influenza has been confirmed in a 22-month-old boy from Mexico City who died earlier this week in a Houston-area hospital. The boy, who had several underlying health problems, had traveled with his family to visit relatives in Texas.</p> <p>Swine flu was confirmed in laboratory testing done by the U.S. Centers for Disease Control and Prevention in Atlanta. The Texas Department of State Health Services was notified of the finding earlier today.</p> <p>Preliminary illness investigation information indicates that on April 4 the boy had traveled with his</p>

	<p>family on a commercial flight from Mexico City to Matamoros, Mexico, for a visit with relatives in Brownsville, just across the Mexico-Texas border.</p> <p>The boy developed a fever on April 8 followed by other influenza-like symptoms. He was admitted to a Brownsville hospital a few days later and the next day was transferred to a Houston-area hospital by a medical transport service.</p> <p>Though an illness investigation continues, state health officials said the boy would not have been infectious on the Mexico-to-Matamoros flight and that none of the boy's known close contacts has subsequently become ill with influenza-like symptoms.</p> <p>Citing personal privacy concerns for the boy's family, medical confidentiality requirements and the absence of an obvious health threat from the boy to the public at large, state health officials declined to provide specific dates or other details at this time.</p>
94	<p><b>(Sent 1:51 pm) State of Michigan</b> Media Advisory Briefings on Status of Influenza A (H1N1) Virus in Michigan</p> <p>What: Briefings on the status of Influenza A (H1N1) virus (previously referred to as swine flue) in Michigan</p> <p>When: Wednesday, April 29, 2009</p>
93	<p><b>(Sent 1:17 pm) Gov. Perry Bolsters Precautionary Measures to Address Swine Flu in Texas</b> Governor's Press Office: 512-463-1826</p> <p>AUSTIN – Gov. Rick Perry today bolstered the state's precautionary measures to address the swine flu threat as a result of confirmed cases in certain parts of the state by issuing a disaster declaration for the entire state of Texas. The disaster declaration allows the state to implement emergency protective measures and seek reimbursement under the federal Stafford Act for protective measures associated with the state's response to this public health threat.</p> <p>“Texans need to know there is no cause for panic and Texans can be assured that the state will take every necessary precaution to protect the lives of our citizens,” Gov. Perry said. “My office, along with the Department of State Health Services and other state, local and federal partners, have a plan in place to protect Texans should there be a pandemic flu outbreak or other health emergency.”</p>

90	<p><b>(Sent 12:08 a.m.) SICCL-OPM Director Berry Drives Plan to Increase Telework among Federal Employees</b> <i>Advisory group would set standards; Telework Manager serves each agency</i></p> <p>Washington, D.C. -- U.S. Office of Personnel Management Director John Berry today announced a comprehensive plan to jumpstart agency telework programs out of a plodding first gear into a cruising fifth gear, giving tens-of-thousands more Federal employees nationwide the opportunity to leave their</p>

	cars at home, and work from home. Today, only 5 percent of the nation's 1.9 million Federal employees telework.  <a href="http://www.opm.gov/">http://www.opm.gov/</a>
89	<p><b>(Sent 12:08 a.m.) NICCL-OPM Director Berry Drives Plan to Increase Telework among Federal Employees</b> <i>Advisory group would set standards; Telework Manager serves each agency</i></p> <p>Washington, D.C. -- U.S. Office of Personnel Management Director John Berry today announced a comprehensive plan to jumpstart agency telework programs out of a plodding first gear into a cruising fifth gear, giving tens-of-thousands more Federal employees nationwide the opportunity to leave their cars at home, and work from home. Today, only 5 percent of the nation's 1.9 million Federal employees telework.</p> <p><a href="http://www.opm.gov/">http://www.opm.gov/</a></p>
88	<p><b>(Sent 11:52 a.m.) VIRGINIA COMMISSIONER OF AGRICULTURE AFFIRMS THAT PORK PRODUCTS ARE SAFE AND THAT CONSUMERS CANNOT CONTRACT THE H1N1 VIRUS BY EATING PORK PRODUCTS</b> Contact: Elaine Lidholm, 804.786.7686</p> <p>Todd Haymore, Commissioner of the Virginia Department of Agriculture and Consumer Services (VDACS), has affirmed the statement of Secretary Vilsack of the U.S. Department of Agriculture about the safety of pork products. "I want to reiterate what Secretary Vilsack said on three key points," said Haymore. "One, there is no evidence at this time that U.S. swine have been infected with this virus. Two, our pork and pork products are safe to eat. And three, our Virginia pork producers are very consistent and thorough in their bio-security practices to prevent the introduction or spread of disease. We have a comprehensive surveillance system in Virginia and in the United States to monitor animal health, and our producers and processors all know it is in their best interest to adhere to a strict program of bio-security."</p>
87	<p><b>(Sent 4/28) Government of Canada Provides Update on Prevention Measures Being Taken Regarding Human Swine Influenza</b></p> <p>(OTTAWA) Minister of Health Leona Aglukkaq and Chief Public Health Officer Dr. David Butler-Jones today provided an update to Canadians on further actions that have been taken by the Government of Canada in the management of the Human Swine Influenza outbreak. The federal government continues to work closely with the provinces and territories and international partners to protect the health and safety of Canadians.</p>
86	<p><b>(Sent 10:57 p.m.) South Carolina DHEC update on swine flu sampling</b></p> <p>COLUMBIA, S.C. - A total of 10 probable cases of the swine flu virus has been identified in the state, the S.C. Department of Health and Environmental Control announced today.</p> <p>"Samples that are untypeable and considered probable cases are being sent to the national Centers for Disease Control and Prevention for further evaluation and testing," said Jerry Gibson, M.D., chief of DHEC's Bureau of Disease Control. "We expect that those who are sick to voluntarily isolate themselves for a short time and those who were exposed should voluntarily quarantine themselves at home."</p> <p><a href="http://www.scdhec.gov/administration/news/2009/nr20090429-01.htm">http://www.scdhec.gov/administration/news/2009/nr20090429-01.htm</a></p>
85	<b>(Sent 10:38 a.m.) State Officials Clarify Name of Influenza A (H1N1) Virus</b>

	<p>INDIANAPOLIS – State officials are encouraging media outlets to use Influenza A (H1N1)/North American/Human when referring to the current influenza strain, rather than swine flu.</p> <p>The virus causing the current influenza outbreak is not a virus that normally infects pigs, but a combination of human, swine and bird viruses. The flu virus causing the current outbreak, now called Influenza A (H1N1)/North America/Human, has adapted itself to be easily transmitted from person-to-person.</p>
84	<b>(Sent 10:37 a.m.) SICCL--ESF 15 Information Update</b>

70	<p><b>(Sent 7:04)</b> Federal communicators, Please find the attached ESF 15 Communications Summary and Information Update for the H1N1 flu outbreak.</p>
69	<p><b>(6:42 p.m.) Oklahomans Urged to Be on Watch for Swine Flu</b></p> <p>The Oklahoma State Department of Health (OSDH) is urging Oklahomans to be on alert for an unusual strain of swine influenza that has been confirmed in numerous states and several countries. While as yet no cases have been confirmed in Oklahoma, neighboring states of Kansas and Texas have both reported cases and Oklahoma's health officials believe increased surveillance will likely lead to confirmed cases in the state.</p>
68	<p><b>(Sent 6:41p.m.) Kentucky</b> The Dept. for Public Health Commissioner William Hacker did several media appearances about swine flu</p>
67	<p><b>(Sent 6:36 p.m.) Private Sector Communications National JIC update</b></p>
66	<p><b>(Sent 4:48 p.m.) Office Of The Governor Blog: Swine Flu Update</b></p> <p>Dr. Mark Horton, Director <i>CA Department of Public Health</i></p>

	<p>Well, an update is that we are still reporting 11 confirmed cases of swine flu here in California. There are an increased number of cases nationally; Centers for Disease Control is now reporting 64 cases nationally. Most of those new cases are in Texas and New York.</p> <p>We are obviously continuing our efforts here to be prepared. The Governor made mention this morning about the fact that we have already had delivered to us portions of the federal stockpile of TAMIFLU and we have already delivered those to counties that have already had some cases of flu in them. We are continuing our efforts at aggressive surveillance. We have engaged the health care community to help us with that. We have sent epidemiologists to enhance capacities locally to be able to monitor the situation. So we think we're really on top of this.</p> <p>We want to reiterate the importance to individuals of personal hygiene, hand washing, or course covering their nose and mouth when coughing or sneezing, and stay home if you're sick. So those are important things we want to continue to reiterate with the public.</p>
65	<p><b>(Sent 4:10 p.m.) NICCL Advisory: HHS Requested Terminology Update</b></p> <p>We have become very concerned that the term "passive surveillance" when referring to entry screening suggests a laid-back approach, when in fact we are quite proactive in our approach. HHS and CDC will stop using that term in public documents, briefing materials etc, and will talk about what we are doing as "watching out for illness." Key points that come under this rubric:</p> <ul style="list-style-type: none"> <li>* At ports of entry, CBP and Quarantine Station staff have worked for the past several years to establish close collaborative relationships;</li> <li>* CBP staff are trained by Q-Station staff on what to look for; CBP staff regularly request additional evaluation by Q-station staff;</li> <li>* CBP staff are on heightened alert regarding the swine flu situation.</li> </ul> <p>I would ask that all USG communications no longer use the term "passive surveillance" for entrance screening. All communication from here forward should use the term "watching out for illness" when referring to our current recommendation for entrance screening.</p>
64	<p><b>(Sent 3:52 p.m.) NICCL Call Summary: April 28 - H1N1 Flu Outbreak</b></p> <p>A NICCL call was conducted April 28, 2009 at 11:00 am EST to discuss the federal coordination and response to H1N1 flu outbreak. Participants included White House communications, DHS OPA, USDA, HHS, Dept of Education, HUD, HHS and CDC, Dept of Treasury, Dept of Veterans Affairs, EPA, FCC, Dept of State, NORTHCOM and JTF NCR, American Red Cross, NGB, OPM, CBP, ICE, USCIS, TSA, USPS, IRS, DEA, USMS, the Mexican Embassy, the United Kingdom, and Public Safety Canada and numerous DHS components and headquarters offices.</p>
63	<p><b>(Ministry of Health and Long-Term Care) Four Confirmed Cases Of Swine Flu In Ontario</b></p> <p>Dr. David Williams, Ontario's Acting Chief Medical Officer of Health, says there are four confirmed cases of swine flu in Ontario. All cases involved travel to Mexico. Laboratory testing has confirmed that the swine flu virus is the same as the one in Mexico and the United States. Three of the cases are in Durham Region and one is in York Region. All four cases are considered mild and the individuals are recovering at home.</p> <p><a href="http://www.health.gov.on.ca/english/media/news_releases/archives/nr_09/apr/nr_20090428.pdf">http://www.health.gov.on.ca/english/media/news_releases/archives/nr_09/apr/nr_20090428.pdf</a></p>

62	<b>(Sent 3:30 p.m.) New York State Health Briefing</b> Health Commissioner Richard F. Daines, M.D. and State Education Commissioner Richard Mills holds media availability (Red Room, State Capitol, Albany)
61	<b>(Sent 3:23 p.m.) Michigan Identifies Second Probable Case of Swine Flu</b>  <i>State creates new website for swine flu information, updates</i>  LANSING – The State of Michigan today announced that a second probable case of swine flu has been reported in Ottawa County. State laboratory results showed that a 34-year-old Ottawa County woman has a probable case of the swine influenza A (H1N1) virus. The state laboratory results will be sent to the Centers for Disease Control and Prevention (CDC) today to determine if the case is positive. The first probable case was reported yesterday in Livingston County and is still under review with the CDC.
60	<b>(Sent 3:00 p.m.) SICCL Call</b>
59	<b>(Sent 2:49 p.m.) NICCL Advisory: Update to Terminology</b>  Per HSC guidance, the use of the term “Swine Flu” should be discontinued. The current influenza situation should be referred to as “H1N1 Flu Outbreak.”
58	<b>(Sent 1:00 p.m.) Delaware Media Telephone Briefing</b> Delaware's Division of Public Health will conduct its first daily telephone briefing at 1 p.m. today to update journalists on the status of swine flu preparedness and response. Members of the media can access the briefing by dialing the following phone number that corresponds to the county where they are located. Once connected, please provide the pass code 245159.
57	<b>(Sent 11:00 a.m.) NICCL Call</b>

56	<b>FDA Authorizes Emergency Use of Influenza Medicines, Diagnostic Test in Response to Swine Flu Outbreak in Humans</b>  The U.S. Food and Drug Administration, in response to requests from the U.S. Centers for Disease Control and Prevention, has issued Emergency Use Authorizations (EUAs) to make available to public health and medical personnel important diagnostic and therapeutic tools to identify and respond to the swine flu virus under certain circumstances. The agency issued these EUAs for the use of certain Relenza and Tamiflu antiviral products, and for the rRT-PCR Swine Flu Panel diagnostic test.  The EUA authority allows the FDA, based on the evaluation of available data, to authorize the use of unapproved or uncleared medical products or unapproved or uncleared uses of approved or cleared medical products following a determination and declaration of emergency, provided certain criteria are met. The authorization will end when the declaration of emergency is terminated or the authorization revoked by the agency.  <a href="http://www.fda.gov/bbs/topics/NEWS/2009/NEW02002.html">http://www.fda.gov/bbs/topics/NEWS/2009/NEW02002.html</a>
55	<b>Update By Secretary Of Agriculture Vilsack Regarding USDA Outreach Efforts Regarding Swine Influenza A (H1N1)</b>

	<p>"As promised, I wanted to keep you up to date on our outreach efforts.</p> <p>First, let me say again to consumers, there is no evidence at this time that U.S. swine have been infected with this virus.</p> <p>Second, I want to reiterate the same message to our trading partners - our pork and pork products are safe. The discovery of this virus in humans is not a basis for restricting imports of commercially produced U.S. pork and pork products. Any trade restrictions would be inconsistent with World Organization for Animal Health (OIE) guidelines. USDA is working closely with the U.S. Trade Representative's office on these issues.</p> <p><a href="http://www.usda.gov/wps/portal/!ut/p/ s.7 0 A/7 0 1OB/.cmd/ad/.ar/sa.retrievecontent/.c/6 2 1UH/.ce/7 2 5JM/p/5 2 4TQ/.d/1/ th/J 2 9D/ s.7 0 A/7 0 1OB?PC 7 2 5JM_contentid=2009%2F04%2F0132.xml&amp;PC 7 2 5JM_parentnav=LATEST_RELEASES&amp;PC 7 2 5JM_navid=NEWS_RELEASE#7 2 5JM">http://www.usda.gov/wps/portal/!ut/p/ s.7 0 A/7 0 1OB/.cmd/ad/.ar/sa.retrievecontent/.c/6 2 1UH/.ce/7 2 5JM/p/5 2 4TQ/.d/1/ th/J 2 9D/ s.7 0 A/7 0 1OB?PC 7 2 5JM_contentid=2009%2F04%2F0132.xml&amp;PC 7 2 5JM_parentnav=LATEST_RELEASES&amp;PC 7 2 5JM_navid=NEWS_RELEASE#7 2 5JM</a></p>
54	<p><b>(Sent 9:19 p.m.)</b> United States Embassy Mexico</p> <p>Update on Flu Outbreak in Mexico – Center for Disease Control Issues Travel Notice for Mexico; All Schools Closed and Nonessential Consular and Visa Services in Mexico Suspended until May 6</p> <p>The U.S. Center for Disease Control (CDC) recommended on April 27, 2009 that U.S. citizens defer all nonessential travel to Mexico because of the outbreak of H1N1 “swine” influenza. The CDC Travel Notice which advises U.S. citizens of the health risks that may be involved with travel to Mexico and provides a list of precautions travelers and U.S. citizen residents in Mexico can take to reduce their risk of infection, can be found at the CDC website at <a href="http://www.cdc.gov/travel/contentSwineFluMexico.aspx">http://www.cdc.gov/travel/contentSwineFluMexico.aspx</a>. The U.S. State Department has issued a travel alert that can be found at <a href="http://travel.state.gov">http://travel.state.gov</a>.</p>
53	<p><b>(Sent 9:22 p.m.)</b> Scottish Press Notice – Confirmation of Flu Cases</p> <p>Swine flu outbreak</p> <p>Two suspected cases of swine flu in Scotland have been confirmed as positive and both individuals are now recovering at Monklands Hospital in Lanarkshire.</p> <p>In addition, a further seven people from the contact group of the infected people are displaying mild symptoms and are undergoing tests.</p>
52	<p><b>(Sent 7:25 p.m.)</b> Guam has been holding daily briefings since yesterday (April 27th) for department and agency heads, military counterparts and ESF Coordinators at 1PM (ChST) followed by a media brief by the Director of the Guam Department of Public Health at 3PM (ChST).</p> <p>Both these events will occur daily at the Guam Homeland Security/Office of Civil Defense's Emergency Operations Center.</p>

39	<b>(Sent 2:34 p.m.)</b> Virginia Office of the Governor Governor Kaine Announces Precautions to Prepare Virginia to Respond to Swine Flu Outbreak RICHMOND—Governor Timothy M. Kaine announced today that, though there are no confirmed cases in Virginia, the Commonwealth is preparing for any outbreak of swine flu by increasing its communication with healthcare providers, and is preparing to receive additional antiviral medication from the Centers for Disease Control. The state’s Health Commissioner, Dr. Karen Remley, is declaring a public health emergency which will give her more tools to coordinate any necessary response, including access to the state’s database for all licensed health care providers so that information can be more effectively and widely communicated. The state is also extending and enhancing its seasonal flu tracking program to ensure that any confirmed cases are promptly reported and tracked. <a href="http://www.governor.virginia.gov/">http://www.governor.virginia.gov/</a>
